DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ronald Nabozny on March 3, 2005.

The application has been amended as follows:

Claims 1-10 have been canceled.

Remarks

2. Claims 1-10 were canceled as being drawn to a non-elected invention.
3. Applicant's amendment and arguments in support thereof dated December 2, 2004, have been found persuasive.

Applicant added the term "elongated" to claim 11 to further limit the "tapered portions" limitation. The term "elongated" means, "Having more length than width; slender." *The American Heritage Dictionary of the English Language, Fourth Edition* (2000). Applicant's disclosures and claims comport with this definition. See Figures 3-4.

Sawajiri, previously relied on in the 103 rejections along with AAPA, however, discloses a vehicle door latch does not having elongated tapered portions. As shown in Figure 3, the width of the tapered portions (22) far exceeds their length.

It is noted that U.S. Pat. 6,334,649 discloses a child safety seat anchorage having elongated tapered portions. See Figs. 7a-c. However, a forged process forms this anchorage, rather than the process claimed by Applicant. See Col. 3, lines 22-26.
